

SuiteDocs™

SuiteLanguage™

Language Management Center

Create, Modify, Save or Import a new Language with the Language Management Center

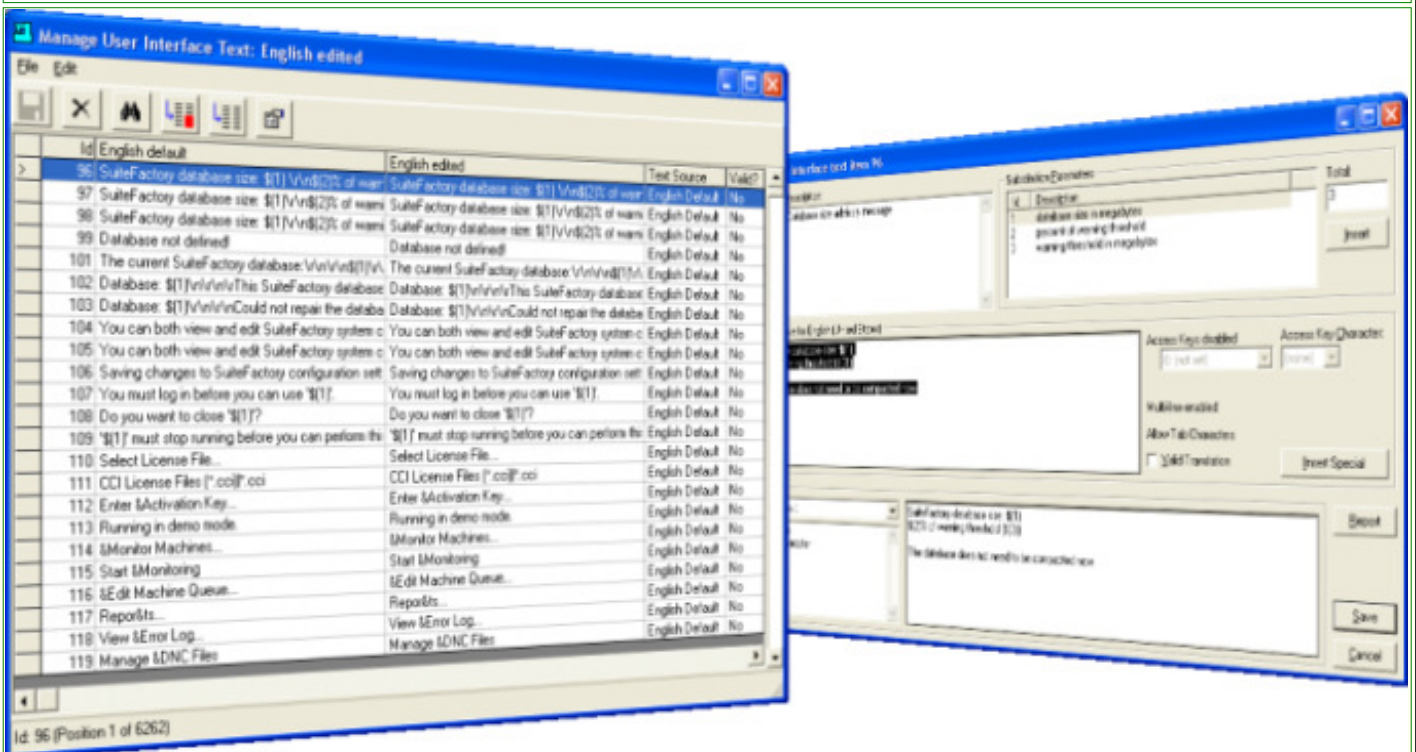

A SuiteDocs™ Application

For Windows 7™/Windows XP™ including Terminal Server Support

SuiteLanguage™ is a database-driven module that allows you to Create, Modify, Save, Import or Export an existing or new Local Language of any Country or Dialect.

You can even change only a few of SuiteDocs™ Menus to suit your tastes and the Language Management Center allows you to make these minor changes to your local system or create a whole new local Language and send them back to CCI to inclusion into its future releases.

SuiteLanguage™ For Localizing and Modifying your Language Easily!

Features:

Configuring A Language Mode

SuiteLanguage™ allows a User to configure how SuiteDocs™ menus appear to aid in modifying or creating a new local Language:

- Display Menu Normally
- Display Menu as Resource ID
- Display as English Menus
- Display as English with Resource ID
- Display as Local Language and English
- Display as Local Language and English with Resource ID

Note: See next section for explanation of Resource ID!

Edit Text & Menus

SuiteLanguage™ Language Management Center application allows Entering and or Modifying of an existing or new Language.

- Side by Side Default vs Modified Text/Menus
- Search for Resource ID
- Find Missing Translation
- Goto Resource ID
- Edit Resource ID Translation
- Delete Resource ID Translation

Notes:

1. You can always recover the default translation!
2. Resource ID is the number associated with the Text/Menu being Edited

<p align="center">Publish Text & Menus</p>	<p>SuiteLanguage™ Publish User Interface</p> <ul style="list-style-type: none"> • After entering new or modifying existing Text/Menus you can publish all user interface Text and Menu Files from this computer to the SuiteDocs™ database. • This translation can then be exported back to CAD/CAM Integration for incorporation into future releases. Chose the Configure/Manage Language/Publish User Interfact Text To SuiteDocs™ Database and click on the Run Button and the latest translation will be saved to SuiteDocs™ Database.
<p align="center">Update Text & Menus</p>	<p>SuiteLanguage™ Updates to Local Computer</p> <ul style="list-style-type: none"> • After Publishing the new or modifying existing Text/Menus you can update all User Interface Text and Menu on this computer. • Chose the Configure/Manage Language/Update User Interface Text From SuiteDocs™ Database, click on the Run Button and the latest translation will be installed and reflected in the Text/Menus.
<p align="center">Export Text & Menus</p>	<p>SuiteLanguage™ Send Updates to CCI for Language Inclusion</p> <ul style="list-style-type: none"> • After Publishing the new or modifying existing Text/Menus you can Export all of modified User Interface Text and Menus back to CAD/CAM Integration. • Simply chose the Configure/Manage Language/Export User Interfact Text and click on the Run Button and the latest translation is saved for sending to CAD/CAM Integration.
<p align="center">Import Text & Menus</p>	<p>SuiteLanguage™ Import Latest Language Updates from CCI</p> <ul style="list-style-type: none"> • After receiving the latest release of the Translation File from CAD/CAM Integration you can import the latest User Interface of Text & Menus. • Simply chose the Configure/Manage Language/Import User Interfact Text and click on the Run Button and the latest translation is installed.
